

## PRESS RELEASE

Paris, June 13th 2022

### THE DEVERYWARE GROUP PRESENTS ITS EXPERTISE AND MOBILE LABORATORIES AT EUROSATORY 2022

DEVERYWARE, the european expert in investigative technologies and services for global security, with its subsidiary TRACIP (France's leading digital investigation private laboratory), will be presenting **its expertise and mobile digital investigation and DNA analysis laboratories** at Eurosatory, the world's leading defense and security exhibition, from June 13 to 17, 2022 in Paris Nord Villepinte.

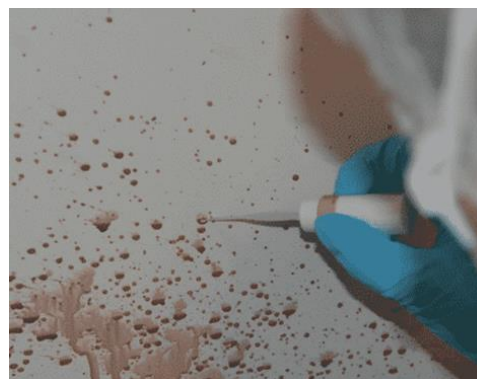

The group will present on its stand (Hall 5B - stand n° B 310) its products and expertise dedicated to :

- **Forensics analysis and training**
- **Mobile laboratories for digital investigation and genetic identification**
- **Language analysis**
- **Telephone data analysis**
- **Real time judicial geolocation**
- **Data recovery**

#### MOBILE LABORATORIES

**mobil'DNA**

► The mobil'DNA, mobile DNA analysis laboratory (developed with the IRCGN - Criminal Research Investigation Institute of the French National Gendarmerie) offers genetic identification resources that can be deployed in the field. Effective in the fight against terrorism, border control, territorial defense or civil security, it allows the identification of victims and assailants in complete autonomy, without the need for a fixed laboratory. Thanks to this innovation, it takes only 2 hours to obtain the genetic profiles of the first 21 DNA analysis samples, which is an invaluable time-saving feat.

The mobil'DNA has been deployed in particular during the following events: Alex storm (Alpes-Maritimes - 2020), Nice terrorist attack (south of France - 2016), or German Wings crash (Alpes du Sud - 2015).

**It will be displayed at Eurosatory, Hall 5B, near door R7.**

More information on the mobil'DNA in this video (<https://youtu.be/WMwXHaMQ9rY>) and on this page (<https://www.tracip.fr/en/>)

► In terms of digital investigation, the mobil'IT, mobile laboratory developed by TRACIP, allows massive data processing in open source (OSINT) and the search for weak signals for the benefit of analysts. Mobile and quickly deployable, it is particularly operational and adapted to the "field" context.

**mobil'IT**

### **THE DEVERYWARE GROUP AT EUROSATORY 2022**

June 13 to 17 2022

Parc des Expositions Paris Nord Villepinte

**Stand Deveryware : Hall 5B – stand n° B 310**

**mobil'DNA : Hall 5B – door R7**

#### **About Deveryware**

Founded in 2003, Deveryware is a leading provider of investigative technologies and services for global security, committed to serving the security of states, companies and populations through innovative digital technologies and high value-added solutions.

The group's solutions help accelerate investigations, analyze evidence, secure against risks and manage crises. The Deveryware Group's offer, together with its subsidiaries TRACIP and Crisotech, covers forensic and digital investigation, real-time geolocation platforms, cybersecurity, language analysis, anti-fraud, crisis management and emergency communications. With a turnover of 41 M€ in 2021 (multiplied by 7 in 10 years) and 160 employees, the group is present in Europe, Africa, North and South America. It attaches significant importance to Research & Development and invests 10% of its turnover in it.

Its values of respect for privacy and its historical knowledge of the security market have made it a trusted partner for many players such as the Prime Minister's Office, the French Ministries of the Interior, Justice, and Economy and Finance, and private players such as Total, Axa and Veolia, SNCF, and RTE. Focused on customer satisfaction, Deveryware has been deploying a Quality-Environment approach since 2012, for which it has received ISO 9001 and ISO 14001 certification and the CSR/Toumaï by Lucie label. The group is a 2020 Champion of the Systematic Paris-Region cluster, ranked in the Top 250 French software publishers, the FW500, the Truffle 100 and the 500 Champions of Growth. Crisotech is a Gold Medalist of the Trophées de la Sécurité 2021 and TRACIP is labeled "Cyber Expert" (label [cybermalveillance.gouv.fr](http://cybermalveillance.gouv.fr)).
